

Micro Precision Electric Grinder

This electric grinder is designed for precision grinding and polishing applications. It features variable speed control and a handpiece with a collet chuck for secure bit holding.

Product Overview

Versatile Precision Grinding

The Micro Precision Electric Grinder is a versatile tool engineered for high-accuracy grinding, polishing, cutting, and shaping tasks. It is specifically designed to handle delicate work, making it an ideal solution for nail care, craft carving, denture and artificial limb polishing, as well as mould finishing. With its compact design and variable speed control, this unit offers the flexibility required for both professional lab environments and hobbyist workshops.

Technical Specifications

Maximum Speed

35000 RPM

Max Speed

Model Identifier

JD105-H

Features & Capabilities

Operational Features

- Variable speed control
- Handpiece with secure collet chuck
- Foot pedal for hands-free operation
- Overheat protection
- Overload protection

Application Areas

Nail Care, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing

Design & Build

Design Attributes

Compact • Lightweight • Durable Construction
