

Microfiber Car Cleaning Towel

This microfiber towel is designed for car washing and detailing. The soft, absorbent material is ideal for drying and polishing vehicle surfaces without scratching.

Product Overview

Professional Cleaning Performance

This high-quality microfiber cleaning towel is engineered for superior absorbency and a scratch-free finish on vehicle surfaces. Combining 80% polyester and 20% nylon, the fabric provides a balance of softness and durability essential for professional car detailing. Its generous size makes it a versatile tool for drying and polishing tasks in any automotive care environment.
