

Microfiber Cloths for Textile Machinery

These soft microfiber cloths are designed for use in textile machinery. They are ideal for cleaning delicate components and maintaining machinery surfaces.

Product Overview

Professional Textile Machinery Maintenance

These microfiber cloths are specifically engineered for the maintenance and cleaning of sensitive textile machinery components. Featuring a high-quality soft texture, they effectively remove dust and residue from delicate surfaces without causing scratches or damage. Their durable construction makes them an essential tool for keeping industrial textile equipment in peak operational condition.

Physical Properties

Material Composition	High-density Microfiber
Color Options	Pink, Yellow, Light Blue, Orange

Performance

Primary Applications

- Delicate component cleaning
- Surface polishing
- Machinery maintenance
- Industrial dust removal

Surface Compatibility

Non-abrasive • Scratch-resistant • Safe for Precision Parts
