

# Microscope Ring Light Illuminator

This ring light illuminator is designed for microscopes and optical instruments. It provides shadow-free illumination, enabling detailed observation and inspection of samples for industrial, scientific, and quality control applications.

## Product Overview

### Professional Ring Light Illuminator

This ring light illuminator is specifically engineered for microscopes and various optical instruments, providing consistent, shadow-free lighting essential for detailed observation. Its design ensures optimal visibility for complex samples, making it a reliable tool for industrial inspection, scientific research, and quality control environments. The unit features a durable white housing and comes ready to use with a standard power connection.

## Technical Specifications

Input Voltage	110 V
Frequency	60 Hz

## Key Features

### Illumination Type

Shadow-free • Circular Fluorescent

## Applications

Ideal Applications	Industrial Inspection, Scientific Research, Quality Control, Optical Microscopy
