Product Overview

Smart Lighting Solution for High-Traffic Areas

This Microwave Motion Sensor LED Batten Tube Light is an intelligent lighting solution designed specifically for parking lots, garages, and temporary passage areas. Featuring an integrated radar sensor, the unit automatically switches to full brightness upon detecting movement up to 8 meters away. To maximize energy efficiency, it dims to 20% luminosity after 30 to 40 seconds of inactivity, making it an ideal choice for 24/7 operational environments.

Technical Specifications

Available Lengths

- 60 cm
- 150 cm

Detection Range	8 m
Dimming Profile	100% (active) to 20% (standby)
Standby Delay	30-40 seconds
Wiring Standard	GB/T5023.5-2
Voltage Rating	300/300V

Energy Efficiency

Annual Electricity Cost Comparison

Light Type	Annual Cost
Fluoro Tube	\$99
LED Tube	\$39
Sensor Tube	\$11

Installation & Compatibility

Recommended Use

Parking Lots, Garages, Passage Areas, Indoor Closed Luminaires
