

Microwave Motion Sensor LED Linear Light

This 18W LED linear light features a microwave motion sensor for motion-activated lighting. It is ideal for parking lots and provides efficient illumination while saving energy by activating only when motion is detected.

Product Overview

Smart Lighting Solution

This 18W LED linear light is specifically engineered for efficient illumination in parking lots and long corridors. Featuring an integrated microwave motion sensor, the unit automatically activates only when movement is detected, significantly reducing energy waste compared to constant lighting. Its durable aluminum housing ensures long-lasting performance in both indoor and outdoor environments.

Technical Specifications

Power Consumption	18 W
Sensor Technology	Microwave Motion Sensor
Housing Material	Aluminum

Application & Usage

Key Efficiency Benefits

- Reduces energy consumption via motion activation
- Eliminates need for 24-hour constant lighting
- Removes requirement for manual switches in long aisles

Recommended Applications	Parking Lots, Long Aisles, Indoor, Outdoor
