

# Microwave Sensor LED Ceiling Light Module

This LED ceiling light module is designed for retrofitting existing fixtures. It features a built-in microwave sensor for motion activation, offering 360-degree coverage.

## Overview

### Smart Retrofit Lighting Solution

This microwave sensor LED ceiling light module is engineered for seamless retrofitting of existing lighting fixtures. It integrates advanced motion-activated technology to provide automatic lighting control, ensuring energy efficiency and convenience. Designed with a 360-degree detection range, it is an ideal upgrade for modernizing traditional lighting setups.

## Technical Specifications

### Installation

Retrofit • Easy Installation

### Sensor Technology

Microwave Induction

### Detection Angle

360 degrees

## Features

### Key Features

- Motion-activated automatic switching
- 360-degree coverage area
- Energy-efficient LED technology
- Compatible with conventional fixtures
