Product Overview

Professional MIG Welding Solution

This MIG welding torch assembly is engineered for precision and efficiency in industrial welding applications. Featuring an ergonomic handle design and a curved neck configuration, it provides the control necessary for high-quality welds. The kit includes essential components like contact tips and a gas diffuser, ensuring readiness for immediate operation.

Technical Specifications

Included Components

- Welding torch with curved neck
- Ergonomic handle
- Copper contact tips (2 sizes)
- Gas diffuser
- Flexible power cable

Welding Process

MIG, Flux-cored arc welding

Design & Ergonomics

Key Features

Ergonomic Handle • Curved Neck Design • Integrated Trigger Mechanism

Electrical & Connectivity

Connection Type

Flexible cable with exposed wire leads
