

MIG/MAG Welding Machine

This versatile MIG/MAG welding machine is designed for various welding applications. It offers precise control over welding parameters, ensuring high-quality welds on steel, stainless steel, and aluminum.

Product Overview

Professional MIG/MAG Welding Solution

This versatile MIG/MAG welding machine is engineered for reliability and precision in various welding applications. Featuring a single-phase, DC portable design with fan cooling and thermostatic protection, it ensures consistent performance for both professional and industrial tasks. The unit supports both Flux (Gasless) and MIG/MAG welding wire, making it a flexible tool for working with steel, stainless steel, and aluminum.

Key Features

Single-phase DC • Portable • Fan-cooled • Thermostatic protection • Flux (Gasless) compatible

Technical Specifications

Technical Parameters

Parameter	MAG-8100X	MAG-8130X	MAG-8150X
Rated supply voltage (V)	230	230	230
Supply frequency (Hz)	50	50	50
No-load voltage (V)	34	35	35

Features & Accessories

Included Accessories

- MIG torch
- Earth clamp
- Welding cable
- Brush/hammer
- Protective mask

Optional Accessories

- Gas bottle
- Regulator
- Wire drawing welding torch
