

# Mill Isolation Pad

This metallic isolation pad is designed to dampen vibration and provide stability for a 5 r mill. It features a concentric ring design with a central opening for mounting.

## Product Overview

### High-Performance Mill Isolation Pad

This metallic isolation pad is engineered specifically for 5 r mill applications, providing essential vibration dampening and operational stability. Its robust construction ensures long-lasting performance in demanding industrial environments. Featuring a precise concentric ring design with a central opening, it facilitates easy mounting and seamless integration with existing mill components.

## Technical Specifications

### Primary Function

Vibration Isolation • Structural Stability

### Compatible Equipment

5 r mill

### Design Features

Concentric ring design, Central mounting opening, Vibration dampening

### Construction Material

Durable metal
