

Mini Camera with CVBS Transmitter

This mini camera includes a transmitter box for CVBS connections. The TX box facilitates wireless transmission of video signals from the camera to a receiver unit.

Product Overview

Compact CVBS Monitoring Solution

This mini camera system features a dedicated transmission box designed for seamless CVBS connectivity. It is engineered to integrate easily into vehicle interiors, making it an ideal choice for small to medium-sized passenger vehicles. The system facilitates reliable video signal transmission, providing a flexible and convenient monitoring solution for backup or safety applications.

Technical Specifications

Signal Type	CVBS (Composite Video Broadcast Signal)
Vehicle Compatibility	Small cars, Medium cars, 7-seater vehicles

Features

Key Features

- CVBS input transmission box
