Product Overview

Versatile Mini Combine Harvester

The GY4L-0.9B is a compact and efficient mini combine harvester designed for small to medium-sized agricultural operations. Engineered for optimal performance, this machine features a robust cutting and threshing system that minimizes grain loss. With its specialized triangle crawler traveling system, it is capable of operating effectively in both dry land and muddy paddy fields up to 30cm in depth.

Technical Specifications

Engine Power

12.5 hp

Engine Power

Model Number

GY4L-0.9B

Field Suitability

Dryland, Muddy Field, Plain Area, Mountain Area

Paddy Field Depth Capability

30 cm

Features

Suitable Crops

- Rice
- Wheat
- Barley
- Oat
- Soybeans

Key Features

Triangle Crawler System • Compact Structure • Lightweight • Easy Operation • Adjustable Cutting Height

Reliability Testing

Over 100 hours of non-stopped working tests
