

Mini Construction Dumper

This mini dumper is a robust construction machine designed for efficient material transport. It is equipped with a tipping mechanism for easy unloading of materials.

Overview

Compact Construction Dumper

This mini construction dumper is engineered for efficiency and reliability in material transport tasks. With a compact design and articulated frame, it offers excellent maneuverability in confined construction sites. The machine combines robust power with a simplified operation system, making it an ideal choice for moving soil, gravel, and debris.

Technical Specifications

Load Capacity

1 ton

Minimum Capacity

5 ton

Maximum Capacity

Engine Type	Diesel
Engine Position	Rear

Key Features

Design & Performance

- Articulated frame for improved handling
- Small turning radius for confined spaces
- Improved hydraulic filtration system
- Robust power output
- Simple and flexible operation

Compliance & Standards	Construction Grade, Heavy Duty
