

# Mini Dumper Tipper with Tipping Bucket

This mini dumper tipper is designed for efficient material handling on construction sites. It features a sturdy chassis and a tipping bucket for easy unloading.

## Overview

### Compact Power for Construction

The Mini Dumper Tipper is a robust construction machine engineered for efficient material handling on demanding job sites. Featuring a sturdy chassis and a high-capacity tipping bucket, it streamlines loading and unloading tasks. Its compact design and heavy-duty tires ensure excellent maneuverability and traction, making it an ideal solution for urban construction projects where space is limited.

## Key Features

### Safety & Design

ROPS (Roll-Over Protection), Ergonomic Controls, Compact Chassis, Heavy-Duty Tires

## Performance

### Performance Highlights

**1000 kg**  
Load Capacity

## Maintenance

### Maintenance

Designed for easy maintenance with accessible components to ensure minimal downtime and maximum productivity on site.
