

Mini Electric Engraver Kit

This mini engraver kit is ideal for use on glass, ceramic, plastic, and metals. It is also suitable for security etching.

Product Overview

Precision Engraving Solution

This versatile mini electric engraver kit is engineered for precision work on a variety of materials including glass, ceramic, plastic, and metals. Designed with a lightweight body and an intuitive on/off switch, it offers excellent control for detailed projects and security etching applications. The kit comes complete with a set of 10 diamond-tipped bits and a dedicated power supply, making it a ready-to-use solution for professional workshops.

Technical Specifications

No-Load Speed

12000 rpm

Speed

Transformer Input	230V AC
Transformer Output	12V DC
Cable Length	2 m
Bit Shank Size	2.35 mm

Included Accessories

Included Bits

- 10pc Diamond Tipped Bits
- Storage Case
- AC/DC Power Pack

Compliance & Certification

Certifications

CE • GS • RoHS Compliant

Applications

Suitable Materials	Glass, Ceramic, Plastic, Metal
