Overview

Compact and Agile Performance

This mini excavator is designed for flexibility and convenience, making it the ideal solution for work in confined areas and small spaces. Despite its compact footprint, it delivers robust digging forces and reliable hydraulic performance for construction, landscaping, and utility applications. Built for precision and ease of operation, it offers excellent maneuverability and stability across varying terrains.

Technical Specifications

Operating Weight	1030 kg
Rated Power	7.5 KW
Bucket Capacity	0.02 m ³
Bucket Width	400 mm

Operational Metrics

Digging Capabilities

8 KN Max Digging Force	16 Mpa Hydraulic Pressure	58 % Max Gradeability
----------------------------------	-------------------------------------	---------------------------------

Movement and Swing

Parameter	Value
Travel Speed	1.6–2.6 km/h
Swing Speed	9 rpm
Traction Force	7.6 KN
Arm Swing (L/R)	75°/50°

Dimensions

Operational Reach

- Max Digging Height: 2373mm
- Max Dumping Height: 1951mm
