

Mini Oil-Filled Radiator

This mini oil-filled radiator is designed for supplemental space heating. It has multiple fins to increase the surface area and improve heat dissipation.

Product Overview

Compact Personal Heating Solution

The Mini Oil-Filled Radiator is an efficient, compact heating unit designed specifically for personal use in small to medium-sized spaces. It utilizes green environmental conducting oil to provide consistent, quiet, and energy-efficient warmth. With safety features like overheat protection and an adjustable thermostat, it offers a reliable way to maintain comfortable temperatures.

Technical Specifications

Steel Thickness	0.5 mm
Fin Dimensions	125mm x 320mm
Fin Configuration	5 to 9 fins

Features & Safety

Efficiency

- Energy-efficient heat emission
- Green environmental conducting oil

Safety Features	Overheating Protection, Power Indicator Light
Controls	Adjustable Thermostat
