Product Overview

Compact Performance for Water Management

The QB series mini peripheral electric water pump is engineered for efficient clean water transfer and domestic pressure boosting. Designed with a robust cast iron body and a precision brass impeller, it provides reliable performance for homes, gardens, and small irrigation systems. Its compact size and ease of maintenance make it an ideal cost-effective solution for diverse residential and light agricultural applications.

Technical Data

Supported Frequencies	50Hz, 60Hz
Model Series	QB60-80

Construction & Materials

Pump Body Material	Cast Iron
Impeller Material	Brass

Safety & Features

Protection Features

Thermal Overload Protection

Applications

Recommended Applications

- Domestic water supply
- Garden and small irrigation systems
- Pressure boosting
- Water transfer from shallow wells
