

Mini Pick with Fiberglass Handle

This mini pick is designed with a durable head for effective digging and prying. It features a plastic-coated fiberglass handle for a comfortable and secure grip.

Overview

Compact Utility Pick

This mini pick is designed for precision tasks in tight spaces where standard tools are too cumbersome. Featuring a durable black head with a chisel-like end, it offers excellent performance for light excavation, gardening, or construction work. The fiberglass handle is reinforced with a plastic coating, ensuring a comfortable grip and long-lasting durability in various environmental conditions.
