Overview

Compact Harvesting Efficiency

The 4L-0.5 is a versatile mini harvester designed specifically for rice and wheat crops. This compact machine combines reaping and swathing functions to streamline harvesting operations in small to medium-sized agricultural plots. Its lightweight design ensures maneuverability in tight spaces while minimizing soil compaction, offering an affordable solution for efficient crop gathering.

Technical Specifications

Model Number	4L-0.5
Engine Power	8.53 kW
Engine Speed	2400 r/min
Structural Weight	500 kg

Performance Metrics

Productivity	0.053-0.133 hm ² /h
Fuel Consumption	10.5-13.5 kg/hm ²

Quality Standards

Harvesting Quality Metrics

3 % Max Loss Rate	2 % Max Mingled Rate	2 % Max Broken Rate
