

# Mini Rice and Wheat Harvester Reaper Swather

This mini harvester reaper swather is designed for harvesting rice and wheat. It has a 0.8M reaping width and efficiently cuts and lays crops in swaths.

## Product Overview

### Efficient Harvesting Solution

The 4G80 mini harvester is a compact and efficient agricultural machine designed for harvesting rice and wheat crops. This versatile reaper and swather is engineered for small to medium-sized fields, offering ease of operation and maneuverability. It features a robust cutting mechanism that ensures minimal grain loss, while the reliable engine provides consistent performance and fuel efficiency.

## Technical Specifications

Model Number	4G80
Reaping Width	0.8 M
Header Type	Vertical
Putting Form	Strip spread

## Performance Metrics

### Working Efficiency

**0.13 ha/h**

Min Efficiency

**0.2 ha/h**

Max Efficiency

Matched Power Source	JF168 engine
----------------------	--------------

## Compatibility

Suitable Crops	Wheat, Rice
----------------	-------------
