

Mini Rice and Wheat Harvester Reaper Swather

This mini harvester reaper swather is designed for harvesting rice and wheat. It features a 1.2m reaping width and lays crops in neat rows.

Product Overview

Efficient Harvesting Solution

The 4G120A is a compact and efficient agricultural machine specifically engineered for harvesting rice and wheat crops. Designed for small to medium-sized fields, it features a robust engine and a vertical header system that ensures reliable performance. The machine utilizes a strip spread method for laying cut crops in neat rows, significantly simplifying the collection process for operators.

Technical Specifications

Working Efficiency

0.33 ha/h
Max Efficiency

Model Number	4G120A
Reaping Width	1.2 M
Engine Type	170B engine

Operational Features

Header Type	Vertical
Crop Placement	Strip spread
Suitable Crops	Rice, Wheat
