Overview

Versatile Construction Solution

This mini skid steer loader is engineered for high performance in road construction, pavement maintenance, and landscaping applications. Featuring a compact chassis design, it offers superior maneuverability in tight spaces without compromising on structural stability. The integrated concrete mixer attachment allows for efficient on-site concrete preparation and dispensing, making it a highly productive tool for small-to-medium construction projects.

Performance & Power

Engine Options	Perkins, Mitsubishi, Xinchai
Hydraulic System	US Permco Gear Pump
Control System	Italy Hydrocontrol Pilot Joystick

Operator Experience

Cab Features

- Wider cab design (15-20% more room)
- Front door seal
- Anti-collision safety cage
- Seat belt
- Optional seat warmer
- Optional air conditioner

Maintenance & Design

Attachment System

Hydraulic Couplers • Fast Changing System

Maintenance Accessibility	Easy-access upper and back hood design allows service without moving loading arms.
