

Mini Stretch Wrapping Machine

This mini stretch wrapping machine is a compact and efficient solution for wrapping products with stretch film. It utilizes a rotating platform and adjustable tension controls to ensure secure wrapping for shipping and storage.

Overview

Compact Stretch Wrapping Solution

This mini stretch wrapper is specifically engineered for efficiently packaging small to medium-sized objects, whether they are packed in carton boxes or palletized directly. It features a pneumatic top plate that stabilizes lighter, potentially unstable goods during the wrapping process to ensure safe and secure packing. Designed for environments with limited space, this machine is ideal for businesses requiring a compact and reliable solution for their shipping and storage preparation needs.

Technical Specifications

Packing Efficiency

40 loads/hour

Max Loads

Turntable Details

Parameter	Value
Speed	0-20 rpm
Height	600 mm
Max Loading Capacity	100 kg

Machine Dimensions	1740mm x 600mm x 1800mm
Compatible Packing Size	400mm x 400mm x (350-600)mm
Machine Weight	260 kg
Power Supply	220V, 0.8kw

Features & Control

Film Carriage Capabilities

- Pre-stretch system
- Power prestretch 250%
- Variable speed film delivery
- Adjustable up-down speed

Control System	PLC Control
Top Plate Mechanism	Pneumatic, smooth and steady

Consumables

Stretch Film Requirements

Attribute	Specification
Width	500 mm
Thickness	20-25 microns
Max Weight	16 kg
Length	1500 meters

Film Properties	Recyclable, Waterproof, Stretchable, One-side sticky
