Overview

Compact Submersible Performance

This mini submersible water pump is engineered for versatility in small-scale aquatic environments, including aquariums and potted landscapes. Operating on a low-voltage 5V DC power supply, it offers an energy-efficient solution for continuous water circulation. Its ultra-quiet operation and compact, durable design make it an ideal choice for confined spaces where reliability and minimal noise are essential.

Technical Specifications

Input Voltage	5 V
Power Consumption	1 W

Performance Metrics

Key Performance Metrics

0.6 m

Max Head (H.max)

120 L/H

Max Flow Rate (Q.max)

Physical Dimensions

Dimensions and Weight

Attribute	Value
Size	43 x 38 x 30 mm
Wire Length	100 cm
Net Weight	0.11 kg

Features

Included Accessories

- 3x Holding suckers
- 2x Output water pipes
- Integrated sluice gate
