

Mini Tillage Machine

This tillage machine is designed for portable operation, making it suitable for use in mountain and hilly areas. It can be equipped with corresponding equipment for pumping, milling, power generation, harvesting, threshing and other operations.

Overview

Versatile Agricultural Tillage Solution

The 1Z-51 mini tillage machine is a portable and robust agricultural tool specifically engineered for efficient operation in challenging terrains, including mountain and hilly areas. Designed for versatility, it excels at ploughing and harrowing tasks while supporting a wide range of additional operations. With the appropriate attachments, this machine can also be utilized for pumping, milling, power generation, harvesting, and threshing, making it an essential multi-purpose asset for small-scale farming.

Technical Details

Model Number	1Z-51
Primary Functions	Ploughing, Harrowing, Pumping, Milling, Power Generation, Harvesting, Threshing

Operational Suitability

Terrain Suitability

Mountainous Areas • Hilly Areas • Small Fields

Key Design Features

- Portable operation
- Compact design
- Multi-attachment compatibility
