

Mini Tillage Machine

This tillage machine is designed for portable operation, making it suitable for use in mountain and hilly areas. It can be equipped for pumping, milling, power generation, harvesting, and threshing.

Overview

Versatile Agricultural Tillage Solution

This portable tillage machine is specifically engineered for efficient ploughing and harrowing operations in challenging terrains, including mountain and hilly areas. Its compact design allows for easy operation in confined spaces like gardens, greenhouses, and small fields. Beyond soil preparation, the unit supports multi-functional attachments for pumping, milling, power generation, harvesting, and threshing, making it a highly adaptable tool for small-scale farming.

Technical Specifications

Model Type	1Z-51
Supported Operations	Ploughing, Harrowing, Pumping, Milling, Power Generation, Harvesting, Threshing

Design & Usability

Key Design Features

- Portable operation design
- Lightweight construction
- High maneuverability
- Adjustable tilling depth
- User-friendly control system

Ideal Environments

Mountainous Areas • Hilly Terrain • Greenhouses • Small Fields • Gardens
