

Mini Wheat Flour Mill Line

This mini wheat flour mill line is designed for efficient installation in various regions. It integrates cleaning, destoning, dampening, milling, flour grading, and packing into a single system.

Product Overview

Mini Wheat Flour Mill Line

This small-scale, automatic flour mill line is designed for efficient and reliable grain processing in a compact footprint. The system features a robust steel construction and integrates cleaning, destoning, dampening, milling, flour grading, and packing components. It utilizes mechanical roll grinders to precisely separate germ, epidermis, and endosperm to maintain high nutritional content and consistent particle size.

Performance Specifications

Capacity Range

10 t/d

Minimum Daily Capacity

50 t/d

Maximum Daily Capacity

Supported Grains

Wheat, Corn

Operational Features

Key Operational Features

- Automatic feeding system
- Automatic sifting
- Single-operator control
- Integrated pneumatic conveying
- Continuous material flow

Technical Construction

System Components

Component	Function
Roll Grinder	Separates germ, epidermis, and endosperm
Cylindrical Sifter	Flour grading
Pneumatic System	Material conveying
Centrifugal Separator	Grain purification
