Overview

Compact Power for Demanding Sites

The ZL 808 mini wheel loader is a versatile and robust machine designed for efficiency in confined spaces. With an articulated steering system and a high-capacity hydraulic setup, it provides precise maneuverability for construction, landscaping, and agricultural tasks. Its compact footprint combined with a durable 800kg load capacity makes it an essential asset for job sites requiring reliable material handling performance.

Technical Specifications

Dimensions & Physical Specs

Dimension	Value
Overall Dimension	5050*1600*2550mm
Overall Weight	2880kg
Ground Clearance	230mm
Wheelbase	1960mm

Unloading Specs

- Unloading Height: 2500mm
- Min. Unloading Distance: 1000mm

Engine & Drivetrain

Engine Model	ZN390Q
Max Torque	102 N.m
Gearbox Configuration	2 forward, 2 reverse, Hydraulic transmission
Tire Size	20.5-16

Steering

Steering System	Articulate, full hydraulic
Steering Angle	34° ± 1°
