

# Miniature Carbon-Brush DC Motor

This miniature DC motor features carbon brushes. It is typically used for hobby and light industrial applications where a small form factor is needed.

## Overview

### WFK-130SH Miniature DC Motor

The WFK-130SH is a compact, carbon-brush DC motor engineered for applications where space is at a premium. Its cylindrical design makes it an ideal component for hobbyist projects, light industrial mechanisms, and small-scale automation tasks. This motor offers a reliable solution for low-torque requirements, balancing form factor with functional performance.

## Technical Specifications

Motor Type	Carbon-brush DC Motor
Model Number	WFK-130SH
Design Features	Compact, Cylindrical, Carbon-brush
