

Miniature Circuit Breaker MCB

Miniature circuit breaker designed for electrical circuit protection. It is suitable for industrial and residential applications, providing overload and short-circuit protection.

Overview

JVM16-63 Series Miniature Circuit Breaker

The JVM16-63 series is a high-performance Miniature Circuit Breaker (MCB) engineered to provide reliable electrical circuit protection. Designed for both industrial and residential environments, this unit delivers essential overload and short-circuit protection to maintain system integrity. It adheres to the IEC 60898 standard, ensuring compatibility and safety for modern electrical installations.

Technical Specifications

Trip Curve

C63

Key Features

- Overload protection
- Short-circuit protection
- Suitable for industrial and residential use

Voltage Rating

230/400V

Compliance Standards

IEC 60898
