

Miniature Cleaning Brush Set

This set includes four miniature cleaning brushes with varying bristle materials, including nylon, brass, steel, and copper. Each brush features a slim, angled handle and a pointed scraper for precision cleaning of electronic components.

Product Overview

Precision Cleaning Solution

This miniature cleaning brush set is engineered for delicate maintenance tasks in electronics and precision instruments. Featuring four distinct bristle materials, the set allows for versatile cleaning applications ranging from debris removal to corrosion scrubbing. The ergonomic, slim, and angled handle design ensures access to hard-to-reach areas, while the integrated scraper provides additional utility for stubborn residue.

Technical Specifications

Bristle Materials	Nylon, Brass, Steel, Copper
Set Composition	4 pieces

Key Features

Design Features

- Slim, angled handle for ergonomic grip
- Integrated precision scraper at the handle end
- Multi-material bristles for varied surface compatibility
- Designed for delicate electronic component cleaning

Applications

Common Applications

Electronic Devices • Circuit Boards • Precision Instruments • Corrosion Removal • Debris Cleaning
