

Miniature DC Carbon-Brush Motor

This miniature DC motor features carbon brushes, ensuring reliable performance in a compact size. It is designed for efficient energy conversion and durable operation.

Product Overview

Compact DC Motor Solution

The WFK-130SZ is a miniature DC motor engineered with carbon brushes to deliver reliable performance in space-constrained environments. Designed for efficiency and durability, this motor is an ideal component for precision instruments, robotics, and various electromechanical systems. Its small form factor ensures seamless integration into compact assemblies without compromising on energy conversion capabilities.

Technical Specifications

Model Number	WFK-130SZ
Motor Type	Carbon-Brush DC Motor
Designation	WFK-130SZ-2190

Applications

Suitable Applications	Precision Instruments, Robotics, Electromechanical Systems
-----------------------	--
