

Miniature Electric Motor for Sewing Machines

Miniature electric motor designed for sewing machines and other light industrial applications. It provides reliable power and precise speed control and is compatible with various foot pedal controllers.

Product Overview

High-Performance Mini Motor

This compact and efficient electric motor is specifically engineered for sewing machines and light industrial applications. It offers reliable power output and precise speed control to ensure consistent performance during operation. Built with robust construction materials, this motor is designed for long-lasting durability in demanding work environments.

Compatibility

Compatible Foot Pedals

- HF-1
- HF-2
- HF-4
- HF-5
- HF-6

Technical Features

Key Features

Compact Design • Precise Speed Control • Robust Construction

Primary Application

Sewing Machines, Light Industrial
