

Miniature Incandescent Automotive Bulb

This miniature incandescent bulb is designed for automotive lighting applications. Its compact size and standard base ensure compatibility with various vehicle models, making it suitable as a signal lamp, indicator light, or for interior illumination.

Product Overview

Reliable Automotive Illumination

This miniature incandescent bulb is engineered specifically for automotive lighting applications, offering a dependable solution for various vehicle needs. Featuring a clear glass envelope and a robust filament construction, it ensures consistent performance and durability. Its compact design and standard base allow for seamless compatibility with a wide array of vehicle models and lighting fixtures.

Technical Specifications

Operating Voltage	12 V
Bulb Type	Incandescent

Applications

Common Applications	Signal Lamp, Indicator Light, Interior Illumination
---------------------	---

Design Features

Construction Features

- Clear glass envelope
- Robust filament construction
- Compact size
- Standard base
