

Miniature LED Automotive Bulb

This miniature LED bulb is designed for automotive lighting applications. The bulb provides energy efficiency and long-lasting performance and is ideal for instrument panels and indicator lights.

Product Overview

High-Efficiency Automotive LED

This miniature LED bulb is engineered for reliable performance in automotive lighting applications. Featuring a durable blue plastic base and a clear lens, it is designed for secure installation and long-lasting operation. It serves as an ideal solution for instrument panels, indicator lights, and various low-power vehicle lighting requirements.

Technical Specifications

Design Features

- Blue plastic base for identification
- Clear lens for optimal light output
- Energy-efficient LED technology
- Secure-fit design

Primary Applications

Instrument Panels, Indicator Lights, Low-Power Lighting

Performance

Key Performance Indicators

1 High

Energy Efficiency

1 Long-Lasting

Durability
