

Miniature LED Bulb

This miniature LED bulb is designed for various automotive lighting applications. It is suitable for dashboard indicators and interior lights, and operates on low voltage DC power.

Product Overview

Versatile Miniature Lighting Solution

This miniature LED bulb is engineered for reliable performance in low-voltage DC applications. Featuring a clear lens and a distinct green base with dual metal contacts, it is optimized for seamless integration into automotive systems. It serves as an ideal replacement or component for dashboard indicators and interior lighting needs.

Technical Specifications

Power Source	Low Voltage DC
Design Features	Clear Lens, Green Base, Dual Metal Contacts

Applications

Common Applications

- Automotive dashboard indicators
- Interior vehicle lighting
- Low-voltage DC systems
