Product Overview

Compact Performance

The Miniature N20 Geared Motor is engineered for high-efficiency operation in space-constrained environments. It offers superior reliability, quiet performance, and precise control, making it an ideal component for portable electronics and battery-operated devices. With low current consumption and dynamic response, it provides a dependable solution for modern precision mechanisms.

Physical Dimensions

Output Shaft

Dimension	Value
Diameter	2.0 mm
Length	10.5 ± 0.3 mm

Mounting Specifications

- Front faceplate diameter: 17.0 mm
- Mounting holes: 2-M3 screws
- Auxiliary mounting holes: 2.5 mm diameter, 45° angle, 6.5 mm spacing
- Rear faceplate: 24.4 mm diameter, 0.3 mm thickness
- Mounting tab diameter: 1.2 mm

Motor Body Length	30.8 mm
-------------------	---------

Reference Length	42.8 mm
------------------	---------

Performance Features

Key Advantages

Quiet Operation • Low Inertia • Energy Efficient • Low Cogging • Battery Compatible

Typical Applications

Portable Medical, Smart Electronics, LED Lighting, Hand Tools, Wearables, Personal Hygiene, Cooling Modules
