

Miniature Shaded Pole Motor for Refrigeration

Miniature shaded pole motor designed for refrigerators and refrigeration equipment. It features a compact design with a metal mounting bracket and a cylindrical output shaft.

Overview

Compact Refrigeration Motor

The IS-3210ARCB is a miniature shaded pole motor engineered specifically for refrigeration equipment. Its compact design and durable construction ensure reliable and efficient operation in demanding cooling environments. This unit features a metal mounting bracket and a cylindrical output shaft, making it a versatile component for various refrigeration system applications.

Technical Specifications

Rated Power

10 W

Motor Power

4.5 W

Operating Power

Input Voltage	220-240V
Frequency	50/60Hz
Model Number	IS-3210ARCB
Certifications	CE

Design Features

Construction

- Compact design
- Metal mounting bracket
- Cylindrical output shaft
