

Miniature Spring Clamp with Eyelet

This mini clamp is designed for a secure grip in various applications. It features a spring-loaded mechanism and an integrated eyelet for easy attachment.

Product Overview

Miniature Spring Clamp with Eyelet

This miniature spring clamp is engineered for versatile pulling operations in tight, confined spaces. Featuring a robust drop-forged construction, it ensures reliable strength and durability for demanding industrial and automotive applications. The self-tightening serrated jaws provide a secure, positive grip, while the integrated eyelet allows for easy attachment and positioning.
