

Mining Lip Assembly for Heavy Machinery

This lip assembly offers high wear resistance for increased production efficiency. It features a tough construction, high fatigue resistance, and high reliability.

Product Overview

Heavy-Duty Mining Lip Assembly

This mining lip assembly, also referred to as a cast lip or whisler lip, is engineered for heavy-duty excavators, loaders, and bulldozers. Designed to withstand extreme high-impact forces and abrasive mining environments, it ensures optimal equipment efficiency. The construction features reinforced edges and strategic slots to maximize durability and prevent premature wear during rigorous operation.

Compatibility

Compatible Part Numbers

444-1788, 485-1637, 444-1781, 444-1783, 444-1787, 444-1784, 444-1785, 528-9555, 549-4981, 464-0825, 450-0618, 476-7095, 530-0213

Product Range

Full Range of GET Components

- Mining Tooth, Pin and Adapters
- Mining Lip Assembly
- Mining Lip Shrouds
- Mining Wing Shrouds
- Mining Half Arrows

Application

Suitable Machinery

Excavators • Backhoes • Front Shovels • Electric Shovels • Loaders • Bulldozers • Motor Grader Rippers
