

MINIRG59 Coaxial Cable with Power

This is a MINIRG59 coaxial cable with power. It is commonly used for transmitting radio frequency signals in various applications.

Product Overview

Professional Grade MINIRG59 Coaxial Cable

This MINIRG59 coaxial cable is engineered for reliable signal transmission in professional communication and video security systems. It features a robust dual-cable construction, integrating both the coaxial signal line and a dedicated power conductor for streamlined installation. With high-quality shielding and durable PVC jacketing, this cable ensures consistent performance and protection against environmental interference.

Coaxial Specifications

Shielding Construction

Layer	Material	Construction
Shield 1	Aluminum Foil	15mm
Shield 2	CCAM	144/0.12mm Braiding

Conductor Material	BC (Bare Copper)
Conductor Construction	1/0.81mm
Insulation Material	Foamed PE

Power Specifications

Power Conductor Material	CCA
Power Conductor Construction	11/0.3mm

Physical Dimensions

Cable Dimensions

6 mm Outer Jacket Diameter	3.7 mm Coaxial Insulation Diameter	5.5 mm Power Jacket Diameter
Jacket Material	PVC, White
