

Mist Duster for Agriculture and Sanitation

This mist duster is a versatile and efficient tool designed for various applications such as agriculture, sanitation, and pest control. The adjustable nozzle allows for precise control of the spray pattern and droplet size, ensuring optimal coverage and minimizing waste.

Overview

Versatile Mist Duster

The 3WF-2.6 mist duster is a versatile and efficient tool designed for various applications such as agriculture, sanitation, and pest control. It features a powerful engine for generating a high-velocity air stream, which effectively disperses liquid or powder formulations over a wide area. Its ergonomic design and comfortable harness reduce operator fatigue during extended use, making it an ideal solution for maintaining healthy crops, controlling disease vectors, and sanitizing public spaces.

Applications

Suitable Applications

- Agriculture
- Sanitation
- Pest control
- Spraying pesticides
- Spraying herbicides
- Disinfecting
- Fertilizing

Certifications

Certifications & Standards

CE, VA, 400018

Key Features

Operational Features

- High-velocity air stream generation
- Adjustable nozzle for spray pattern control
- Adjustable droplet size
- Ergonomic design
- Comfortable harness for extended use
