

# Miter Saw for Woodworking

This miter saw is designed for making accurate crosscuts and miters in wood. It features a circular saw blade on a pivoting arm, allowing precise angle adjustments for woodworking and construction.

## Overview

### Professional Woodworking Miter Saw

This 10-inch miter saw is engineered for precision woodworking and construction tasks, featuring a powerful 1500W motor for efficient cutting. Designed with versatility in mind, it supports single 45-degree bevel cuts and offers a maximum cutting height of 8cm. The unit includes safety enhancements like a motor brake and a movable baffle plate to accommodate wider workpieces.

## Technical Specifications

### Motor Power

**1500 W**  
Power

Blade Diameter	10 inch
Max Cutting Height	8 cm
Bevel Cut Capability	Single 45°

## Features

### Safety & Operation

- Integrated motor brake for safety
- Movable baffle plate for wider workpieces
- Clear safety guard

Compliance & Standards	PA6-6F30, Standard Safety Compliance
