

Miter Saw with Safety Guard

This miter saw is equipped with a circular blade enclosed in a transparent safety guard. It is designed for making precise angle cuts in various materials and features a rotating base and fence for workpiece alignment.

Product Overview

Precision Cutting Performance

This professional-grade miter saw is engineered for high-precision angle cuts across a variety of materials, primarily wood. It features a robust design with a transparent safety guard for enhanced operator visibility and protection during operation. With a rotating base for angle adjustments and an integrated fence, this tool provides the stability and control required for accurate, repeatable cuts in demanding workshop environments.

Technical Specifications

Cutting Features

- Rotating base for precise angle adjustments
- Integrated fence for workpiece alignment
- Locking mechanism for secure operation
- Adjustable depth control

Safety Standards

Transparent Safety Guard, Blade Housing, Locking Mechanism

Construction

Build Quality

Component	Material/Finish
Blade Housing	Silver-colored metal
Cutting Platform	Silver-colored metal
Handle	Black
Base	Black
