

Mixed Flow Inline Duct Fan

The Mixed Flow Inline Duct Fan is engineered for low noise operation while providing exceptional static pressure. Constructed with durable ABS material and featuring a ball bearing motor, this fan ensures long-lasting performance and reliability.

Product Overview

High-Efficiency Ventilation Solution

This Mixed Flow Inline Duct Fan is engineered to deliver a balance of low-noise operation and high static pressure, making it an ideal choice for demanding ventilation environments. Constructed from durable ABS material and powered by a reliable ball-bearing motor, it ensures consistent performance and longevity. Its user-friendly design facilitates quick and easy installation for a variety of professional applications.

Technical Specifications

Housing Material	ABS
Motor Type	Ball Bearing Motor

Key Features

Installation	Easy Installation
Performance Highlights	Low Noise, High Static Pressure, Mixed Flow Design
