

# Mixed Metal Scrap

Mixed metal scrap consists of various discarded metal components showing corrosion and damage. The weathered materials, including steel and aluminum alloys, are intended for recycling or disposal.

## Product Overview

### Mixed Metal Scrap

This product consists of a diverse collection of mixed metal scrap, suitable for recycling and industrial processing applications. The material includes a variety of ferrous and non-ferrous components, such as steel, aluminum, and various alloys. It is intended for industrial use where materials are processed for reclamation or disposal.

## Material Composition

### Included Materials

Ferrous Metals, Non-Ferrous Metals, Steel, Aluminum, Mixed Alloys

## Condition and Quality

### Condition

Weathered • Recycling Grade • Discarded

### Visual State

Disorganized heap exhibiting signs of corrosion and damage from exposure to elements.
