

Mixer Plant Liner Plate

This liner plate is an accessory and spare part designed for mixer plants. It is constructed from wear-resistant materials to ensure durability.

Product Overview

Industrial Mixer Plant Liner Plate

This high-wear resistant liner plate is engineered specifically for concrete mixer plants, designed to withstand abrasive industrial conditions. Constructed from durable Hi-Chrome material, it provides exceptional longevity, capable of processing over 200,000 cubic meters of concrete. Its robust mechanical properties ensure reliable protection for mixing equipment in demanding environments.

Material & Standards

Material	Hi-Chrome
Standards Compliance	CN:KM TB Cr15-25-GT, US:ASTM A532 Class a Type D

Performance Metrics

Key Performance Indicators

62 HRC
Max Hardness

200000 m³
Useful Life Volume

Mechanical Properties

Mechanical Specifications

Property	Value
Hardness	52-62 HRC
Strength of Extension	380 N/mm ²
Extension at Break	1%
Shock Impact Value	e5ak N.M/CM ²
Flexural Strength	e60ak N.M/CM ²
