

MMA-200 Manual Welding Machine

The MMA-200 is a compact and portable manual welding machine designed for MMA (Manual Metal Arc) welding. It features IGBT (Insulated Gate Bipolar Transistor) technology for efficient and stable performance.

Product Overview

Compact and portable design suitable for various professional and DIY welding applications.

MMA-200 Manual Welding Machine

The MMA-200 is a compact and portable manual metal arc (MMA) welding machine engineered for stability and efficiency. Utilizing advanced IGBT technology, it provides precise current control and reliable arc striking for consistent weld quality across various applications. Designed for durability in demanding environments, this welder features an intuitive interface with thermal overload protection, making it an ideal choice for both professional and DIY welding projects.

Technical Specifications

Easy-to-use interface featuring adjustable current settings and thermal overload protection.

Inverter technology provides a stable arc and efficient power consumption for consistent results.

Available Arc Current

- 120A
- 140A
- 160A

Welder Type	MMA (Manual Metal Arc)
Pulse Frequency	60 Hz
Rated Duty Cycle	35 %

Logistics & Status

Condition

New

Place of Origin

Zhejiang, China
