

MMA-400 Welding Machine

The MMA-400 is a compact welding machine with advanced inverter technology. It offers stable performance with strong compensation capability and resistance to voltage fluctuation.

Overview

Professional MMA-400 Welding Solution

The MMA-400 is a robust welding machine utilizing advanced IGBT inverter technology and single PCB design for reliable performance. It offers high efficiency, energy savings, and excellent compensation capability against voltage fluctuations. Designed for portability and ease of use, it is an ideal choice for welding low carbon, medium carbon, and alloy steels.

Technical Specifications

Performance

400 A

Rated Capacity

Compatible Materials

- Low carbon steel
- Medium carbon steel
- Alloy steel

Technology

IGBT Inverter, 1 PCB

Safety Features

Over-voltage protection, Over-current protection, Thermostatic control, Fan cooled

Included Accessories

Includes essential safety gear like an auto-darkening helmet for operation protection.

Standard Accessories

- Electrode holder
- Earth cable
- Hand-held shield
- Welding brush
- Carton box
